

Pipeliners Podcast Equipment Setup

Packing List

- Headphones
- USB microphone
- USB-micro-to-USB-A cable
- Microphone stand
- Microphone holder

Setup

1. Carefully screw the microphone holder onto the microphone stand.
2. Adjust the microphone stand height by loosening the collar above the stand base. Tighten the collar to lock your adjustment.
3. Swing the legs of the base out to stabilize the stand.
4. Place the microphone in the holder, switch side up.
5. If necessary, further adjust the height of the microphone to be able to comfortably speak into the microphone.
6. Take the headphones out of the case and unfold them. If necessary, unwrap the headphone cable.
7. Take the USB cable out of the case and unwrap if it necessary.
8. Plug the 3.5mm headphone jack into the headphone out on the base of the microphone.
9. Plug the small end of the USB cable into the USB connector on the microphone. Do not plug the other end of the cable into your computer until you have read the software setup .pdf that was emailed to you.
10. The instructions for the software setup for your operating system begin on the following pages:
 - Mac OS X- pg. 4
 - Windows XP (Service Pack 2)- pg. 6
 - Windows Vista- pg. 9
 - Windows 7 or newer- pg. 10
